About This Game

Puzzle Tactics is a turn-based and grid-based tactics game played in various small levels. You play as the blue team with the goal of defeating the red team's units before losing your own. Later levels are more difficult and introduce more unit types in battle. The game is controlled using the mouse.

Units

- Warrior: a powerful melee unit who can also hit multiple targets
- Archer: can shoot at targets 4-6 tiles away but only in 4 directions
- Mage: can attack with a fireball that hits multiple targets and ignores walls
- Defender: has the most health and can shield itself and allies to reduce damage
- Necromancer: summons skeletons to deal and take extra damage
- Skeleton: somewhat like a warrior, but weaker and with only a basic attack

Title: Puzzle Tactics
Genre: Indie, Strategy
Developer:

10/10 Hands down best resource pack of the year, runs 7x as smoothly as arkham knight and has triple the amount of original gameplay as Black ops 3. Clicked on it and nothing shows up!!! Very disappointing!!!. good tutorial could go a bit more in depth but still great. I have absolutely no idea what to do.. When is part 2 coming out?. Nice click-and-point mystery.. You know, even with how obscure this game is, it's possibly one of the best strategy games I have ever played just for the pure sake that it's so simple, but so mentally, strategically challenging. Territory only lasts for so long, since you harvest money from the land, and that land is slowly destroyed because of it. The war can only go for so long before somebody's section crumbles and falls down into the endless abyss of clouds.. The game looks very cool, I like these games. The game consists of 10 puzzles and is a simple puzzle on the subject of hentai. It is very cheap and has about a hundred achievements, which is a good plus.. Great Game!!!!!!!!!!!!!!!!!!!!!! I want to play the machines that I want to play now; not have to slog through the boring ones first. This is supposed to be casual fun not a grind.

Pretty good game to play especially with friends. The mechanics of the game is also simple to learn but you need strategy to win.. i like sam and max. In a world where horror games are bland and obviously manufactured as cheap cash grabs Psychopathics stands an obvious cut above the compition.

With its captivating blend of atmoshpere and psychological thrills words truely cannot do this masterpiece of a horror game justice.

Surely you must play for yourself to experience horror previously unmatched.

Bravo sir, must play 10V10. This game is fun and hilarious, most suitable to play with family and friends, especially during holidays. It's very intuitive, easy to pick up and start to play. It's polished and comfortable. Most people can enjoy it, the young and the old. The levels have intersting variations, and they become more and more challenging as you level up. I tried several times in "Midnight Children" level, but failed to finish it. And I would like to try more to finish all the levels. The gameplay is simple, fast-paced and a lot fun, which makes it stand out from many of other VR games. I would like to recommend it without hesitation.. Yes the pay wall sucks but its Miyabi \ud83d\ude0d\ud83d\udef1\ud83d\udef0d So far she is my best character, controls so well. If there was or will be PvP I think she would be a little OP
